1. Implementasi Fitur Read (Menampilkan Data) Genre dan Author

```
...  
export default function AdminGenres() {  
  const [genres, setGenres] = useState([]);  
  const [loading, setLoading] = useState(true);  
  
  useEffect(() => {  
    fetchGenres();  
  }, []);  
  
  const fetchGenres = async () => {  
    try {  
      const response = await  
axios.get('http://127.0.0.1:8000/api/genres');  
      setGenres(response.data.data || response.data);  
    } catch (error) {  
      console.error("Error fetching genres:", error);  
    } finally {  
      setLoading(false);  
    }  
  };  
  
  const deleteGenre = async (id) => {  
    if (window.confirm("Are you sure you want to delete this genre?")) {  
      try {  
        await axios.delete(`http://127.0.0.1:8000/api/genres/${id}`);  
        fetchGenres();  
        alert("Genre deleted successfully.");  
      } catch (error) {  
        console.error("Error deleting genre:", error);  
      }  
    }  
  };  
}
```

2. Implementasi Fitur Create (Menambahkan Data) Genre dan Author

```

...
export default function AdminGenreCreate() {
  const navigate = useNavigate();
  const [formData, setFormData] = useState({
    name: '',
    description: ''
  });
  const [loading, setLoading] = useState(false);

  const handleSubmit = async (e) => {
    e.preventDefault();
    setLoading(true);
    try {
      const token = localStorage.getItem('token') || '';
      const config = { headers: {} };
      if (token) config.headers.Authorization = `Bearer ${token}`;

      await axios.post('http://127.0.0.1:8000/api/genres', formData,
config);
      alert('Genre created successfully');
      navigate('/admin/genres');
    } catch (error) {
      console.error("Error creating genre:", error);
      alert('Failed to create genre');
    } finally {
      setLoading(false);
    }
  };
}
...

```

3. Implementasi Fitur Edit (Mengupdate Data) Genre dan Author

```

...
export default function AdminGenreEdit() {
  const { id } = useParams();
  const navigate = useNavigate();
  const [formData, setFormData] = useState({
    name: '',
    description: ''
  });
  const [loading, setLoading] = useState(false);
  const [initialLoading, setInitialLoading] = useState(true);

  useEffect(() => {
    const fetchGenre = async () => {
      try {
        const response = await
axios.get(`http://127.0.0.1:8000/api/genres/${id}`);
        const data = response.data.data || response.data;
        setFormData({
          name: data.name || '',
          description: data.description || ''
        });
      } catch (error) {
        console.error("Error fetching genre:", error);
        alert("Failed to load genre data");
      } finally {
        setInitialLoading(false);
      }
    };
  });
}
...

```

```

    fetchGenre();
  }, [id]));

const handleSubmit = async (e) => {
  e.preventDefault();
  setLoading(true);
  try {
    const token = localStorage.getItem('token') || '';
    const config = { headers: {} };
    if (token) config.headers.Authorization = `Bearer ${token}`;

    await axios.put(`http://127.0.0.1:8000/api/genres/${id}`, formData,
config);
    alert('Genre updated successfully');
    navigate('/admin/genres');
  } catch (error) {
    console.error("Error updating genre:", error);
    alert('Failed to update genre');
  } finally {
    setLoading(false);
  }
};

```

Pengujian fitur dan tampilan web

Halaman Genres

Menampilkan semua data genres dan btn create, edit serta delete
