1. Desain database

2. Menambahkan 5 data ke masing2 tabel menggunakan query INSERT INTO

```
Run SQL query/queries on database db_booksales: ⓘ

1 INSERT INTO users (name, email, password, role) VALUES
2 ('Budi Santoso', 'budi@email.com', 'password123', 'customer'),
3 ('Siti Aminah', 'siti@email.com', 'rahasia321', 'customer'),
4 ('Admin Utama', 'admin@toko.com', 'adminpass', 'admin'),
5 ('Rina Melati', 'rina@email.com', 'passrina', 'customer'),
6 ('Andi Wijaya', 'andi@email.com', 'andi1234', 'customer');
7
8 INSERT INTO authors (name, photo, bio) VALUES
9 ('Andrea Hirata', 'andrea.jpg', 'Penulis novel Laskar Pelangi.'),

23 ('Laskar Pelangi', 'Kisah 10 anak di Belitung.', 75000.00, 20, 'laskar.jpg', 1, 1),
24 ('Bumi', 'Petualangan Raib di dunia paralel.', 85000.00, 15, 'bumi.jpg', 2, 2),
25 ('Harry Potter dan Batu Bertuah', 'Awal kisah penyihir cilik.', 150000.00, 10, 'hp1.jpg', 2, 3),

28
29 INSERT INTO transactions (order_number, customer_id, book_id, total_amount) VALUES

3. Mengubah data buku dengan query UPDATE

Run SQL query/queries on table db_booksales.books: ?

```
1 UPDATE books
2 SET price = 80000.00, stock = 30
3 WHERE id = 1;
```

SELECT * SELECT INSERT UPDATE DELETE Clear

☐ Bind parameters ?

Delimiter ; ☐ Show this query here again ☐ Retain query

✓ 1 row affected. (Query took 0.0023 seconds.)

```
UPDATE books SET price = 80000.00, stock = 30 WHERE id = 1;
```
